COMPASS
CYBER SECURITY

COMPASS CYBER SECURITY OVERVIEW

"SHIFTING THE WORLD'S DATA TO BE SAFE AND SECURE"

COMPASS APPROACH

COMPASS Cyber Security is a trusted advisor to organizations on proactive measures that strengthen their cyber security enterprise infrastructure. We believe cyber security involves more than just technology, which is why we've laid out the three pillars of cyber security — people, policies, and technology — to help our clients effectively and efficiently manage their security posture and support our vision to shift the world's data to be safe and secure.

VALUE TO OUR CLIENTS

- Enterprise risk management approach
- 100% vendor agnostic
- Technical and non-technical expertise
- Customized service offerings
- Project management discipline

3 PILLARS OF CYBER SECURITY

PEOPLE

- Every member of an organization has a role.
- Employees are typically the weakest link.

POLICIES

- Organization specific rules and guidelines.
- Absence of official guidance forces employees to "guess" at the organizations position.

TECHNOLOGY

- Should support the organization's policies.
- Defense in depth.

COMPASS SOLUTIONS

- Cyber Security Assessments
- Critical Systems Monitoring
- Cyber Security as a Service (CSaaS)
- Regulatory Compliance Audits (i.e. HIPAA, SEC, PCI, NIST CSF)
- Policy Development
- Employee Best Practices Training
- Executive Crisis Management Training
- Threat Intelligence
- Mock-Phishing Exercises
- Cyber Threat and Risk Analysis
