CYBER SECURITY

THREAT INTELLIGENCE

THREAT INTEL OVERVIEW

Today, it seems organizations are becoming more reactive than proactive when it comes to securing their data. In order to stay ahead of the curve, it is important to have knowledge of the threats to your industry, location, and information technology environment. COMPASS' cyber security threat intelligence services provide our clients with the customized information needed to better protect their sensitive data. **This service will enable you to**:

- **Receive alerts on new vulnerabilities** customized **specifically for your organization, focusing on your vendors, supply chain, and IT environment.**

- **Stay up-to-date on data breach news** related **to your specific industry.**

- **Proactively identify threats** to your organization **before you are targeted.**

- **Understand the current cyber security risks** to **your organization**

COMPASS' Threat Intelligence portal gives insight into data breach trends that enable our clients to take proactive measures to lower their risk. From real-time newsfeeds on industry specific threats, to in-depth reports and dashboards on your specific organization, COMPASS provides a customized solution to assist our clients in making strategic decisions to secure their networks.
