

CYBER SECURITY AS A SERVICE (CSaaS)

Whether an organization has an IT team of one or 100, what's often lacking is a dedicated cyber security professional who can strengthen and maintain the organization's information security across all three pillars (people, policies, and technology). Executives find themselves asking, "Should I hire a cyber security expert or should I find a partner to take the lead?" To assist organizations in building a strong cyber security posture, COMPASS provides expert information security consulting and project management services on a retainer basis. CSaaS provides organizations with a broad range of cyber security services and eliminates or delays the need to develop or hire this capability internally. Organizations can realize the benefit of a team of security experts at a fraction of the price.

WHAT IS CYBER SECURITY AS A SERVICE (CSaaS)?

COMPASS' Security Engineers and Analysts have experience across the full range of information security-related disciplines. Utilizing this experience and expertise, **we have developed a package of security services that includes:**

- Security Essentials Health Check
- Quarterly Vulnerability Scans
- Semi-Annual Mock-Phishing Exercises
- Semi-Annual Employee Security Awareness Webinars
- Quarterly Security Newsletters
- Security Monitoring of Critical Assets
- Threat Intelligence Alerts

These services will increase an organization's information security and minimize the impact in the event of a data breach.

THE BENEFITS

- Provides comprehensive, in-depth defense against hackers
- Significantly increases data protection
- Addresses the three pillars of cyber security: people, policies, and technology
- Minimal labor effort required on staff
- Delivers a holistic security solution (vs. a piecemeal offering)
- Addresses most common data security risks
- Provides ongoing resources and support for security-related needs

"The COMPASS team is working hand-in-hand with our IT Department to improve our security posture by utilizing the resources we already have. The team is great to work with and the guidance and hands-on assistance they provide are helping us improve our security profile."

DUNCAN BOOTH | Assistant Head of Finance and Operations | Roland Park Country School
